

GREEN COMMITTEE

MISSION STATEMENT

ESTABLISHMENT AND AUTHORITY

The Green Committee was established in 2009 by the Board of Directors

COMPOSITION

The committee consists of volunteers who are members of the 40 Homewood community. One member will be Chair, or two members will be Co-chairs. One member will be the Liaison with the Board of Directors.

MISSION

The Green Committee strives to seek practical solutions, to brainstorm for innovative ideas and to educate ourselves, and those around us, in areas that promote positive impact on our micro, municipal and planetary environments. The Green Committee works co-operatively with the Board and Management of 40 Homewood, City of Toronto and environmental organizations.

Our goals include:

- Improving the environmental performance of our building and individual homes
- Assisting in the conservation of energy and resources
- Increasing waste diversion from landfill sites
- Enriching the health and well-being of those we call our neighbours by diligent awareness of environmental issues affecting us as individuals
- Being community proactive and globally minded
